## Flooring Installation Tools & Supplies

Del Val Tile carries not only all the best name manufacturers and a huge selection of tile, but we also carry tools and supplies needed to complete the job!

From a home owner, DIY... Do it yourselfer to a professional installer we can provide you the tools, equipment and supplies to complete your tile project!

### Tile Spacers

Tile spacers are used to make sure the lines in between the tiles are perfectly spaced. Sizes range from 1/16 inch to nearly 1/2 inch. For most kitchens, I think a 1/8 inch space is pretty normal. I spent a lot of time choosing my grout and wanted it to show. So, I went with a 1/4 inch grout line. It looks decent, but if I had to do it over again I would have chosen a 1/8 inch grout line.

### 1/4 Notched Trowel

1/4" notched trowel for use on spreading adhesive. The trowel combs the adhesive onto the surface. It is recommended to use a trowel that is 2/3 the thickness of the tile you are setting.
